

CMA Quotevision™

Use CMA Quotevision™ to manage and analyse OTC pricing data in real-time, for faster, more informed trading decisions.

Who should use CMA Quotevision™?

Front-office and middle-office professionals across a variety of financial institutions can benefit from CMA Quotevision's accurate real-time OTC price data and intuitive query and analysis tools.

Hedge Funds & Asset Managers

CMA Quotevision™ gives portfolio managers, traders and analysts instant access to high-quality data enabling:

- **research and analysis** of possible trading opportunities
- **execution decisions** based on the most timely and reliable information available
- **monitoring of the market** and positions in real time.

Investment Banks

CMA Quotevision™ delivers real-time OTC pricing information that enables:

- **price and valuation teams** to incorporate live front-office pricing data into their workflow
- **correlation, exotics and hybrids desks** to hedge positions and manage intraday risk.

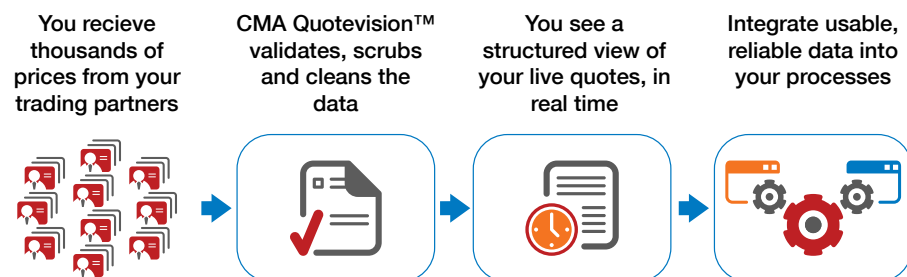

A clear and structured view of your current OTC credit prices, instantly

CMA Quotevision™ structures, in real time, the vast amount of market prices you receive from your trading partners, giving you a clear, accurate view of your live indicative quotes for:

- CDS, LCDS, Indices, Tranches, Switches
- Bonds, Convertibles Bonds
- Syndicated Loans
- ABX /CMBX.

Fast and easy to use, with an intuitive interface

- **Accurate:** act on reliable data that is scanned, validated, scrubbed and cleaned in real-time by our artificial intelligence-based parsing system, which is monitored by a dedicated team of experienced data analysts.
- **Flexible GUI:** a single customisable view to suit your priorities. Analyse issuer capital structures, understand market depth, construct multiple portfolios and view pricing history in graphical and numerical formats.
- **Integrated analytics:** view CDS pricing across all price types, converted using the standard ISDA model and interest rate data.
- **Quick search:** save time searching for issues, instruments and prices with advanced search capabilities across your entire email content.
- **Excel™ add-in:** access all of your CMA Quotevision™ content via Excel™, including the latest quote, best quote, historical end-of-day pricing and tick data.
- **Open architecture:** integrate CMA Quotevision™ content into your in-house systems to facilitate flash P&L and portfolio risk management using a reporting database or message API that is updated in real-time.

Key benefits

The clarity and reliability of information delivered by CMA Quotevision™ enables individuals across your organisation to maximise profits and minimise losses:

Research and analysis

- identify and analyse trading opportunities quickly and with confidence
- integrate the most up-to-date market data into your analytics and systems, to analyse how best to structure trades
- catalogue and database all your intraday quote information for historical trend analysis.

Execution decision support

- act immediately on the latest and best prices
- obtain the best price for trades and any associated hedges by comparing the pricing information from all your counterparties quickly and accurately
- structure and execute trades based on reliable and up-to-date information.

Monitor the market

- keep on top of market moves and sentiment through real-time access to the OTC market
- track intraday market moves and assess their impact on your portfolio
- feed live prices into your portfolios, P&L reports and risk models, for a more accurate view of your positions
- calculate profit based on existing positions with the latest market bid/offers
- analyse and manage your risk exposures quickly
- automate the mark-to-market accurately, using high-quality independent market data.
